

Dear Parent/Guardian(s)

Imagine you are a young child and you awake one night to find your bedroom filling with smoke. Your house is on fire! What would you do?

To make sure your child has the skills that can potentially save his/her life, we will be teaching burn prevention and fire safety in class. A key element of this learning process will include a tour at our school of the *Oklahoma Farm Bureau Fire Safety House*.

This mobile classroom is specifically designed to teach children vital burn prevention and fire escape techniques through a fun, safe simulation of common hazards. *The Fire Safety House* is equipped with a kitchen, bedroom and living room.

The *House* fills with a nontoxic, water-based smoke. This realistic environment teaches children to “crawl low” to safety. A heated door helps children choose the right exit. An escape ladder is used to exit from the bedroom.

If your child suffers from asthma, other respiratory conditions or allergies that may be irritated by nontoxic smoke, please indicate that below before allowing him/her to tour the *House*.

Note: All participants should wear pants/shorts and no-heeled shoes the day of the tour.

My child, _____ may tour the Fire Safety House.

My child, _____ has asthma, an allergy or respiratory condition that may be irritated by the nontoxic smoke and should not be in the House during that part of the program.

My child, _____ may not tour the Fire Safety House.
